

About us

We believe in a world with simple TPMS solutions.

Meet our 1-Sensor, the OE manufactured smart solution that covers 98% of all passenger cars. We designed a new adjustable angle valve which offers maximum applicability on every rim.

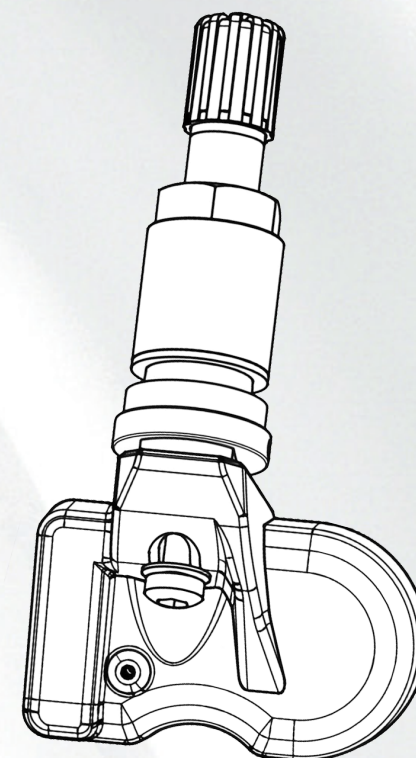

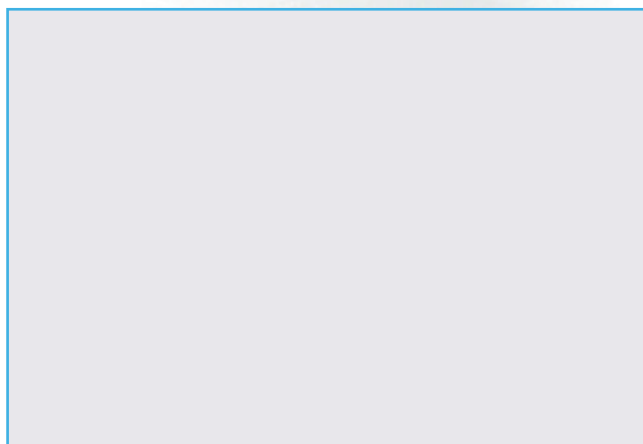

Safe time and program up to 12 sensors in 1-go.

1-Sensor: number 1 in coverage, service and reliability
Increase your workshop efficiency and reduce operational costs with the new "standard" in TPMS technology.

Our promises

-  Simplicity
-  Quality
-  Reliability
-  Safety

Your distributor:

1-Sensor for every wheel!
Less hassle, more control!

Programmable TPMS sensors

Less stock, more control!

For direct TPMS systems, programmable with ATEQ tools.
Supports 315/433 MHz, compatible with all vehicles and OE specifications.
Adjustable angle, long battery life and high reliability.
1-Sensor your maximum efficiency in the workshop.

-  Easy to install
-  Ateq compatible and programmable
-  OE Quality with NXP chip
-  98% vehicle coverage
-  Adjustable angle
-  Safe time and program up to 12 sensors in 1-go.

BLE (Bluetooth) TPMS sensors

Bluetooth Low Energy technologie

Specially designed for OE Bluetooth TPMS systems.
100% compatible with the OE specifications and vehicle updates reliable.
Fast installation with the highest performance.

Programmable Truck TPMS sensors

Quality sensor for heavy duty conditions!

Heavy Duty vehicles can be equipped with the 1-Truck sensor.
Ateq compatible and programmable
Long life and reliable performance
Sensor body designed for belt and for valve applications
1-Truck sensor, maximum coverage, the solution for professional Truck maintenance.
